3. Reason for the announcement

Forecast for business results of FY2013 (the year ending March 31, 2014) has been "undetermined" because it was difficult to reasonably assess the estimates under a situation that an increase in electricity rate was under application.

Since, today, an adjusted application for increase in electricity rate was approved by Minister of Economy, Trade and Industry, we announce our forecast of revenues for FY2013. The estimated effect on the revenues by an increase in electricity rate for the half-year and full-year of FY2013 is approximately \(\frac{2}{3}\)6.0 billion and \(\frac{2}{3}\)88.0 billion, respectively.

With respect to expenses, it is difficult to estimate reasonably because further efficiency improvements and restraint of spending based on the results of a government scrutiny are still on the way. For these reasons, the forecast of profit is undetermined.
